THE "NEXT PRESIDENT."

The Colonel Makes a Humorous Reference to Its Application.

Col. Bryan was introduced by the chairman as the next President of the United States. He was received with unbounded enthusiasm and applause, and it was some moments before he was able to proceed with his speech.

Colonel Bryan said:
"In 1896 I was introduced so many times as the President of the United States that to be thus introduced now does not cause my heart to beat faster than is its wont. I have a greater ambition than to be President of the United States. When I say this, I do not mean that I want the title to read. President of the United States and Emperor of the Philippines. I think the greatest ambition a man can have

is to be a citizen.
"I am glad to be among you. I have been in Utah before and another at your grand mountains and fertile valleys does me good. I am a Democrat, but yet in favor of a King (the Domo-cratic nominee). I want to see him elected by a majority greater than you gave me in 1896.

"When the Republican party adopted its gold and trust methods, it was much weakened by the loss of the silver Republicans. Then a few gold Demo-crats went over to them and made it still weaker. The people of the East will watch the result of this election here as a moral example. These peo-ple have heretofore misunderstood our motives, but now they are beginning to understand that our labor is to make all classes of citizens know their duty wards each other. All we ask is that each man shall recognize his duty to the other. It is said that there will be one heaven for rich and poor. shall be contented that if on this earth I can bring the two classes close enough

so that an introduction on the other side will be unnecessary.

Speaking as to income tax, Mr. Bryan said that if the tax were unconstitutional, the people should be accorded the privilege of amending the Constitution.

Constitution "The Republican party is now per petuating upon the people a war tax. In England they have an imperial policy, but there they tax the income to pay the expenses. Here they make the people pay the taxes and thus furnish the funds to fight the wars."

"Today the Republican party puts up capital above labor in all the fabric of government. It makes it possible for the government to draw upon the masses for money to fight its battles and walk the sons of poverty up to the guns of the enemy while it cannot lay its hands upon the pocket book of the wealthy to defray its expenses.

While the Republican party was propointed a secretary of the treasury, Mr. Gage, who was allowed to make gold speeches in this country, while the com-mission of Senator Wolcott was in Europe attempting to adjust the financial reform professed. Mr. Wolcott after-wards complained that Mr. Gage's action so hampered the commission that it was anable to do anything.

After finally getting possession of the government the senators who look up to Mark Hanna and say: 'Give us this day our daily opinion came out boldly for the gold standard.

"If you send a Republican from Utah do you suppose he will dare to vote against the party majority in Congress if a financial measure is under sideration? The time is now past when any one outside of a lunatic asylum thinks that the Republican party ever intended or does intend to do anythin to re-habilitate sliver at the ratio of 16 to 1 or at any other ratio,

The gold standard means that there be no recognized money except

"I want an independent financial policy resting upon gold and silver so that we may have prosperity withstanding what the land grabbing nations of Europe may do; and I am here in Utah in order to advocate the candidacy of your man King who stands for the same idea.

"In 1896 the Republican party did not dare to say that it desired to retire a party of our currency; but today they advocate the proposition to allow the national banks to increase or diminish the currency. We are to have an elas-tic currency with the national banks having hold of both ends of the elas-
